

AO CYBER SYSTEMS

AOCore

The AI Control Plane

"One API. Every Model. Total Control."

THE CHALLENGE

AI spend is spiraling with no visibility, PII flows to providers unprotected, and shadow AI is everywhere — forcing teams to choose between vendor lock-in and integration chaos.

THE SOLUTION

AOCore is AOCyber's AI control plane — one OpenAI-compatible API to **500+ models**, with its **AOSentry** security & governance layer delivering PII tokenization, guardrails, immutable audit logs, budget controls, and post-quantum cryptography. Security, routing, and observability, converged.

WHAT YOU GET

- ▶ **Unified AI Gateway** — 500+ models, one OpenAI-compatible API — swap models without code changes
- ▶ **Guardrails & Jailbreak Defense** — Enforce content policy and block prompt-injection attacks
- ▶ **Enterprise Identity** — SSO (SAML/OIDC), SCIM provisioning, and RBAC across the AI stack
- ▶ **Post-Quantum Crypto** — ML-KEM, ML-DSA & CNSA 2.0 — shipping today, not on a roadmap
- ▶ **PII Tokenization** — Detect and reversibly tokenize sensitive data before it leaves your perimeter
- ▶ **Budget Controls** — Real-time spend limits by team, project, or individual
- ▶ **Immutable Audit Logs** — Hash-chained, tamper-evident records of every AI interaction
- ▶ **Self-Hosted / Air-Gapped** — Deploy on your infrastructure or in GovCloud; data never leaves

PRICING

TIER	PRICE	BEST FOR
Starter	\$129/mo	Individual developers & small projects
Growth	\$549/mo	Engineering teams needing shared governance
Business	\$1,699/mo	Compliance and budget-control needs
Enterprise	Custom	SSO, SCIM & dedicated support
DIB / DOD-IC	\$9K-\$36K/yr	Defense compliance packages

No platform fee — a flat subscription, not a percentage of your AI spend.

WHY AOCYBER

- ◆ **Full-stack convergence** — gateway, governance, and observability in one platform
- ◆ **Post-quantum cryptography from Day 1** — no competitor ships PQC today
- ◆ **Tokenization, not just detection** — PII is protected before transmission
- ◆ **No platform fee** — vs. the ~5.5% spend tax charged by gateways like Portkey

Deploy in under an hour — request a demo or start a PoC.
